Scope of delivery

- Headlight mask NRS
- Mounting set (mounting, headlight holder, clamp)
- LED headlight

Fixing material:
- 2 x pan-head screw M6x12 + washer

Mounting

1. Remove the original headlight. To do this, loosen the two screws of the headlight mounting and unplug the headlight at the rear.
2. first mount the attachment between the triple clamps.
3. screw the LED headlight first, then the headlight mask to the holder. Then fix the whole package to the previously mounted "fastener" with the M8x16 gate hinge screws.
4. vary the headlight and the mask as desired - at the desired position then tighten all screws firmly.

We recommend using a medium-strength screw lock (e.g. LOCTITE 243, blue) for all screws.

The wiring must be carried out professionally.
